Health 360° lunches the smart phone application

Warm greetings from Health 360°,

Health 360° Ancillary Services W.L.L is a new young dynamic Insurance ancillary services provider in the Kingdom of Bahrain. We offer wide-ranging healthcare medical insurance services as a third party administration (TPA) and we can tailor those services to meet your needs and standards.

On this background, Health 360° Ancillary Services W.L.L is proud to announce the official launching of Health360° mobile application; being the first of its kind in Bahrain and GCC servicing clients locally & abroad.

Health360° mobile application features a lot of services for its clients, these services range from member profile containing insured information to our exclusive SOS services and providers search. Moreover, the app allows an easy access to social media (YouTube & Instagram) as a useful tool for keeping our clients updated.

Health360° mobile app offers special features on the move, beneficiary will gain easy access to their details by one-touch through our Mobile app. With wide range services as follows:

- **Member profile** section, providing insured primary information.
- **Health360° provider's locations** via Google maps locator with unique nearest feature.
- **Claim submission and status tracking.**
- **SOS emergency services** enable a quick connect to Health360° team either by direct connect to Health360° hotline or by an emergency message to Health360 team with current user location. (Mobile internet service is not a must).
- **Health360° address, and contact information.**
- **Notifications** of special events, updates, and more.
- **Provider updates** (popups).
- **Social media** (YouTube & Instagram).
